

# WANT TO GET PAID TO DO SCIENCE?

## WVU ENVIRONMENTAL GEOCHEMISTRY LAB IS HIRING AN UNDERGRADUATE RESEARCH ASSISTANT

Interested in gaining hands on sedimentology and analytical chemistry experience?

The WVU Department of Geology and Geography Environmental Geochemistry lab is hiring a self-motivated and disciplined undergraduate researcher to contribute to a project studying the stratigraphy and chemistry of cave sediments. This ties into the broader goal of a project looking at cave sediments and their potential as a paleo-climate proxy.

Duration: remainder of Fall 2019-March 1<sup>st</sup> 2020

Broad tasks will include:

- Sediment characterization
- Sediment sample prep (homogenize, dry, weigh, sieve, etc.)
- Organic matter extractions (acid/base dilution, sieving, grinding, centrifuge, etc.)
- Data entry in excel

Preference given to students with prior lab experience or lab coursework and those willing to work over winter break. Students will be expected to work 4-10 hours per week.

Students should send an email that expresses your interest, degree track, and resume to Autum Downey ([ardowney@mix.wvu.edu](mailto:ardowney@mix.wvu.edu)) and Dr. Dorothy Vesper ([Dorothy.Vesper@mail.wvu.edu](mailto:Dorothy.Vesper@mail.wvu.edu)) by **Nov. 15<sup>th</sup>, 2019**
